Tucked in between tall buildings and expressways are parks with lush greenery where time flows quietly. Even in this digital age, traditions and culture dating back to the Edo Period can still be glimpsed on the streets. The world-leading metropolis of Tokyo has many faces, which defy simple description. These faces of the city are constantly undergoing change by the 13 million people who live here. This booklet shows today's Tokyo from various perspectives, including urban functions, industry, culture, environment, and everyday life. We hope it has given you an opportunity to think about the direction in which this city is heading.

Tokyo is a kaleidoscope of attractive features.

- Washoku (traditional Japanese food culture) is a UNESCO Intangible Cultural Heritage.
- Tokyo is said to have 3,620 sushi bars.
- The average longevity of Tokyo residents is 79.0 years for men and 85.5 years for women.
- People find and turn in to the police an average of 9.38 million yen in cash per day!
